

# Cleantec

## Fact Sheet

### Tandem Fabric Softener / Sour

#### DESCRIPTION

**Tandem** is an economical product which provides the features of both a fabric softener and a sour. The simplicity of having these two functions performed by one product offers convenience and economy. **Tandem** can prevent yellowing and rust spots when iron contaminated water is encountered. It will also reduce rejects by removing residual alkalinity. **Tandem** also lubricates the fabric, increasing the productivity of flat work operation. Less wrinkling, sticking and static means increased ironer speeds. **Tandem** is safe for use on all cottons, linens and synthetic fabrics.

#### FEATURES AND BENEFITS

- **Convenience of one product**  
Simplicity of having two functions performed by one product.
- **Concentrated**  
Provides excellent economy and leads to fewer drum changeovers.
- **s iron deposition**  
Helps prevent yellowing and rust spots in iron contaminated water.
- **IOA available on request.**
- **Colour coded labelling**  
Ensures easy product identification and simplifies training.

#### DIRECTIONS FOR USE

**Tandem** should be added during the final rinse cycle of the formula.

For or iron staining, continued use is required at the recommended dosages.

**Note:** Heavy iron or rust stains may require alternative treatment.

Ratio	Application
