Fact Sheet

Dairy Chlor Concentrated Laundry Bleach

DESCRIPTION

Dairy Chlor is a 10% available liquid chlorine bleaching agent suitable for use under controlled conditions on white cotton, linen and some polyester / cotton fabrics.

When used correctly, **Dairy Chlor** will remove most stains, eliminate micro-organisms with its powerful disinfectant action, and maintain whiteness of fabric. An effective wash program with selected alkalis, detergents or soap is necessary prior to the use of **Dairy Chlor** to ensure satisfaction with result obtained. The criteria to remember is wash fabric clean, then bleach stains out. To attempt to bleach fabric clean with excessive amounts of bleach will almost certainly cause fabric damage.

Dairy Chlor is a light yellow liquid with a chlorine odour

FEATURES AND BENEFITS

- Super concentrated
- Fast acting
- Whitens whites
- Highly active at all temperatures up to 65°C

DIRECTIONS FOR USE

Maximum effectiveness is obtained when used in the bleach operation at 60°C for 6 to 8 minutes, at a low dip level, following the hot wash.

A stock bleach solution is made up of 1 litre of **Dairy Chlor** to 9 litres of cold water. Between 2 to 3 litres of solution is required for a 45kg general wash load. Increase quantities for heavily stained or recovery wash purposes. DO NOT add neat **Dairy Chlor** directly to a wash load as gross fabric damage may occur.

Dairy Chlor is suitable for use in stock tank solutions as related to batch washer, washer extractor operations, etc.

PACKAGING

25 litre drum	P/C 14188
200 litre drum	P/C 14219
1000 litre IBC	P/C 15426
