# Fact Sheet

## Maxifoam Foaming Sanitiser / Detergent

### DESCRIPTION

**Maxifoam** is a liquid heavy duty foam cleaner for the removal of proteinaceous and fatty soils from food processing plants. **Maxifoam** contains a corrosion inhibitor and can be used in areas where contact with soft metals such as aluminium cannot be avoided.

**Maxifoam** is a clear, pale yellow, mobile liquid with a chlorine odour.

### FEATURES AND BENEFITS

- **Cost effective, single pack foam cleaner**  
*The unique blend of caustic, chlorine, sequesterants, a corrosion inhibitor and high foam surfactants provide a true single pack alkali foam cleaner.*
- **Powerful, fast acting formula**  
*Provides rapid soil penetration while the soil suspending properties prevent the redeposition of soil. The water hardness sequestering properties eliminate scale formation.*
- **Safe on soft metals**  
*Contains a corrosion inhibitor which provides protection for mild steel and aluminium.*
- **Excellent foaming properties**  
*When used through a Campbell Cleantec foam applicator, Maxifoam produces a highly stable, good quality foam.*

### DIRECTIONS FOR USE

**Maxifoam** should be dispensed through Campbell Cleantec foaming equipment. To ensure the most cost effective results, the concentration of **Maxifoam** may be varied depending on the application.

The recommended concentration range for **Maxifoam** is 1.5 to 3.5% v/v (or 1:65 to 1:30).

**Maxifoam** solutions are safe on stainless, mild steel and aluminium, but should not be used on galvanise.

IOA available on request.

For further details, please contact your Campbell Cleantec Representative.

### PACKAGING

25 litre drum	P/C 17074
200 litre drum	P/C 16422
1000 litre IBC	P/C 17078
