PACER

CHLORSAN DW

Warewashing Detergent and Presoak

DESCRIPTION

Pacer Chlorsan DW is a premium quality warewashing powder formulated to provide outstanding results and economy. The non-caustic formula removes the toughest food soils and stains, leaving crockery and cutlery squeaky clean.

Chlorsan DW is suitable for cleaning all types of wares including soft metals*, and is an excellent cutlery and crockery soak. The built-in rinse additive ensures fast, streak-free drying.

Chlorsan DW is a white powder with a mild chlorine odour.

FEATURES AND BENEFITS

- **Ultra-concentrated triple-action formula**
Removes soils and stains and assists streak-free drying. Reduces the number of products required in the kitchen.
- **Soft metal safe**
The non-caustic formula improves the appearance of metallic objects, including wares made of soft metals such as aluminium.
- **Stabilised formula**
Chlorsan DW remains fully active for 24 months, guaranteeing consistent results throughout the life of the pail.
- **Colour coded, iced and numbered**
Ensures the correct product is used and simplifies training.

DIRECTIONS FOR USE

AUTOMATIC WAREWASHING DETERGENT

- Fill the dishwasher with clean water, ensuring the drain plug is firmly in place to prevent leaks.

- Add ½ cup of Chlorsan DW to a standard single tank machine. Use half this rate for dome type machines.
- Every 10 washes, add another ¼ - ⅓ of a cup of Chlorsan DW to restore the detergent level.
- Drain and refill the tank with fresh water when the wash water becomes excessively soiled.

PRESOAKING OF CUTLERY AND CROCKERY

- Start filling the sink or a pail with warm water (approx 45°C). Add ⅓ - ½ a cup of Chlorsan DW per 15 litres of water ensuring it fully dissolves. Soak the wares for 15-45 minutes, then remove from the solution and wash through the dishwasher. Old plastic wares may require a longer soak or higher concentration of Chlorsan DW.

Note: Not recommended for soaking polycarbonate. May cause environmental stress cracking, clouding or crazing.

*** Always test one item of soft metal from each manufacturer before universal use to confirm stability.**
