

FACT SHEET

PACER

RESTORE

Activated Oxygen Soaker

DESCRIPTION

Pacer Restore is a premium quality destaining powder with activated oxygen to bleach and sanitise in warm to hot water. It safely bleaches and breaks down soils without stripping colours and has no irritating odour.

Restore's unique enzyme system quickly breaks down proteinaceous and baked-on soils, while its wetting agents penetrate, lift and emulsify fats and oils. **Restore** is safe to use on china, stainless steel and will not yellow plastics. It is also ideal for soaking stained fabrics prior to laundering or for use as a nappy soaker.

Pacer Restore is a free flowing white powder with blue specs and virtually no odour.

FEATURES AND BENEFITS

- **Effective in warm water**
Restore does not require 65 °C water to activate. This lessens the risk of scalding and reduces energy costs.
- **Enzyme boosted**
Protein soils are dissolved away without the use of high caustic, corrosive chemicals.
- **Highly concentrated**
Restore has twice the cleaning power of conventional products. It offers outstanding economy and reduces the need to store large quantities of product.
- **Colour coded, iconed and numbered**
Ensures the correct product is used and simplifies staff training.

DIRECTIONS FOR USE

KITCHEN SOAKER:

Use 12 grams of Restore per litre (1/2 cup per 10L) in warm water, allow to soak for 30 to 60 minutes. For very heavy soils soak overnight. Drain and rinse wares with clean water.

LAUNDRY SOAKER/NAPPY SOAKER:

Use 4 grams of Restore per litre (1/3 cup per 20L) in warm water, allow to soak for 15 to 30 minutes or up to 3 days for nappies. Rinse out clothes/nappies in fresh water.
