

FACT SHEET

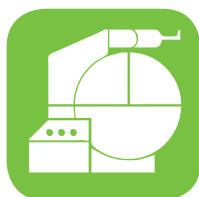

PACER

SYSTEM

Softener / Sour

4

DESCRIPTION

Pacer System is a combination softener sour that neutralises free alkalinity in the final rinse and imparts a protective softening agent to the fabric. It is concentrated for excellent economy and imparts a light residual fragrance. Fabrics are left soft and fluffy and iron stains are eliminated with the use of **System**.

Pacer System is a green coloured opaque liquid with a pleasant floral fragrance.

FEATURES AND BENEFITS

- **Concentrated formula**
Reduces bottle changeovers and eliminates the need for large stocks of product. Excellent economy is achieved through the low dose rate.
- **Advanced formula**
Sours, softens and reduces static build up in one action. Adjusts fabric pH to that of skin to prevent irritation and assure wearer comfort.
- **Colour coded, iconed and numbered**
Product selection is as simple as 1, 2, 3, 4. Staff enjoy using the system and mistakes are avoided.
- **Encapsulated 5L bottle**
Prevents staff coming in contact with neat chemical and eliminates any chance of spills. Connection to the automatic dispenser is very simple and does not involve unscrewing caps or messy drawtubes.

DIRECTIONS FOR USE

The alarm sounding on the dispenser signals a bottle requires changing. Press the PRIME button on the handset to silence the alarm. Raise the coupling into the UNLOCKED position. Replace the empty bottle with a new bottle and lower the coupling into the LOCKED position. There is no need to prime the lines as this will automatically occur next time the pump is activated.
