

PRODUCT INFORMATION SHEET

CHESSER LIQUID LAUNDRY

DESCRIPTION & USE

Chesser Liquid Laundry is available in two options either **Floral** or **Eucalyptus**. Both products are effective detergents designed for use in top loading washing machines or for hand washing.

Eucalyptus Liquid Laundry is a clear green viscous liquid with the freshness of pure eucalyptus oil . Floral Liquid Laundry is an opaque blue liquid with a fresh floral perfume that matches the perfume used in Chesser Fabric Softener.

FEATURES & BENEFITS

Both products offer good all round cleaning performance at a value for money price. The complex blend of five detergents gives good cleaning in cold or warm water of a wide range of soils from grease and fat to clay and blood.

Stubborn dirt and stains can be pretreated by rubbing the neat product in first.

Because they dissolve rapidly, and are not strongly alkaline, Chesser Liquid Laundry detergents are ideal for hand washing.

Both detergents are also phosphate free and rapidly biodegradable so they help prevent any damage to the environment.

HOW TO USE

Add 1/3 cup to a machine for a normal wash. Add a little extra for heavy soiling or a large load.

For hand washing use 1/4 cup in a laundry trough or 1/8 cup in a bucket.

HOW TO USE (CONTINUED)

Heavily soiled clothes can be treated in a number of ways. For cuffs and collars, greasy or cosmetic stains pre-spray with Chesser Pre-Wash Stain Remover or pretreat by rubbing a little neat Chesser Liquid Laundry into the stain. Then wash with a little extra Chesser Liquid Laundry.

For coloured stains such as wine, tea, fruit juice, coloured food stains, etc. a bleach will assist.

Either chlorine or oxygen bleaches can be used with Chesser Liquid Laundry. If chlorine is preferred use Chesser Bleach by adding 1/2 to 1 cup to 1 litre of water then adding to the wash. Do not use on coloured fabrics, and do not premix with Chesser Liquid Laundry before adding.

For most stain removal problems we recommend Chesser Bright, a powdered oxygen bleach with added detergents and builders. It can be used on all normal washable fabrics (not recommended for wool or silk) and is much safer to use than chlorine. Simply add 1/4 cup Chesser Bright to your wash in addition to Chesser Liquid Laundry.

TECHNICAL DETAILS

Chesser Liquid Laundry detergents both contain a blend of five detergents that give excellent performance on a wide range of soils and fabrics, in hard or soft water. They also contain soil dispersion and suspension agents, a highly advanced optical brightener and either eucalyptus oil or a fresh floral perfume.

The products have a pH of 10.7 in the neat form, but this drops to 7 which is neutral when at the normal use dilution.

SAFETY

Both products are alkaline in the neat form but neutral when diluted. Take care to avoid eye contact and to minimise skin contact.

SAFETY (CONTINUED)

Material Safety Data Sheets are available on all Chesser Products. Please ensure a current copy is available for your staff.

PACKAGING

Chesser Liquid Laundry products are available in 5 litre or 25 litre drums.
