

PRODUCT INFORMATION SHEET

CHESSER CHLOR

Chesser Chlor is a white powder with a mild chlorine odour. It is used as a combined cleaner, disinfectant and bleach in hospitals, nursing homes, kitchens, and the food processing industry such as Ice cream Machines

FEATURES

- Chesser Chlor combines cleaning, disinfection and bleaching in one easy operation. It is ideal for areas such as bathrooms and kitchens as it bleaches mildew and food stains away at the same time as cleaning.
- Chesser Chlor contains a powerful disinfectant. Chlorine is a broad spectrum disinfectant that kills bacteria, fungi and viruses.

HOW & WHERE TO USE

- For disinfecting clean or lightly soiled surfaces use at a rate of 6g/l (1/4 cup in 10 litres of water).
- To clean soiled areas, or for destaining use at from 10 to 25 g/litre (from just under ½ cup to 1 cup in 10 litres of water).
- Use warm – hot water if the solution is to be used straight away as it increases cleaning efficiency. If solution are to be used for soaking use cold water to prolong solution life.
- Never mix Chesser Chlor with any acid such as Clear Shot or chlorine gas will be liberated.
- Rinse all food contact surfaces with potable water after use.
- Store all chlorinated products in a cool area.
