

PRODUCT INFORMATION SHEET

PRE-WASH STAIN REMOVER

Use neat for pre-treating stains

FEATURES

- Pre-Wash Stain Remover is a clear pale yellow liquid with a fresh orange odour. It is used neat for pre-treating stains such as grease, oil, cosmetics, inks, etc. before washing, making them much easier to remove.
- Pre-Wash Stain Remover contains a blend of solvents and detergents that assist with the removal of a wide range of different stains.
- With its fresh orange odour it is much more pleasant to use than many prewash products which contain a lot of liquid hydrocarbons.
- Pre-Wash Stain Remover is much more economical to use than aerosol products as it can be refilled from a bulk container.
- Pre-Wash Stain Remover is also much better for the environment as the trigger spray is refillable, and there are no hydrocarbon propellants to add to the Greenhouse effect.
- Pre-Wash Stain Remover is designed to remove oily soils and solvent soluble soils such as ink and paint.

HOW & WHERE TO USE

- Pre-Wash Stain Remover is ideal for cuffs and collars (which contain oils from the body), cosmetics, greasy food soils, and will remove some ink and paint, especially if very fresh. For mineral oils (such as engine oil), an aerosol product with a high solvent content will give the best results.
- Spray over stain and leave for at least 1 minute before adding to wash. For bad stains such as ink, paint or heavy deposits, leave for 10 minutes before adding to the wash.
- Use in a well ventilated area. Do not spray over fresh paint work.
