

ZERO-BAC

Skin Protectant Gel

TDDI19-1-1100

PRODUCT INFORMATION DATA

Information contained on this Product Information Data Sheet is to the best of our knowledge accurate and reliable. However, no guarantee is given nor intended as conditions of handling and use of this product are beyond our control.

DESCRIPTION: -

Zero-Bac is a hand gel designed to help prevent the spread of germs and cross infection in food handling / preparation areas and high-risk occupations such as Nursing homes, Childcare facilities etc.

Zero-Bac is a fast evaporating, pH neutralised, non-greasy formulation that, on drying is fragrance free and contains emollients to condition the skin.

Zero-Bac forms an integral part of any HACCP Plan in Food Service Industries. Zero-Bac provides a barrier against the transfer of germs by hand. Use Zero-Bac before food preparation, after toilet use or handling contaminated items.

Zero-Bac passes the TGA test for commercial Grade disinfectants, Option C.

PHYSICAL PROPERTIES

Appearance	Viscous water white liquid
Odour	Isopropanol
pH	6.5 – 7.5
Specific Gravity	0.920 – 0.940
Activ Matter	48.0 ± 0.5% w/w

DIRECTIONS FOR USE: -

Apply 1 - 2 pumps to clean dry hands. Rub over the whole hand surface until dry, this takes approximately 30 seconds. Do not rinse off. No water or towel is required.

This is NOT a replacement for hand washing. In fact the long lasting affects of Zero-Bac last for several hours even when the hands are washed with soap and water up to four times during this period. Hands should still be washed after smoking or using the toilet, or any other activity that would normally prompt a hand wash.
